

November 2011

Dear colleague,

Re: Joint British Diabetes Societies-Inpatient group: Admission Avoidance in Diabetes (ABCD/Diabetes UK sponsored)

The JBDS-IP group is currently completing a piece of work on admission avoidance in diabetes to be presented at Diabetes UK March 2012. We are looking for examples of protocols or procedures that have prevented patients with diabetes being admitted. We would like to be able to illustrate the document, which is aimed at commissioners and acute trust providers, using real-world clinical examples. As the intended readership will be interested in cost-savings, if you are able to provide data on this, that would be very useful.

If you have such an example, we would very much like to hear from you - please complete the single page document attached and return to christine.jones@nnuh.nhs.uk who is collating the information on our behalf. However, if you wish to contact us directly about this work, then please do so.

Kind regards,

Dr Belinda Allan
Hull and East Yorkshire Hospitals NHS Trust
Belinda.allan@hey.nhs.uk

Professor Mike Sampson
